**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 2-3 are, drawn to an apparatus containing a kinematic linkage, classified in class 226, subclass 163.

Group II. Claims 9 and 27 are, drawn to an apparatus containing an attachment plate comprising an adjustment collar having a lock arm, classified in class 226, subclass 196.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as an apparatus not requiring the attachment plate comprising an adjustment collar having a lock arm set forth in group II. See MPEP § 806.05(d).

Claims 10-14 and 28-32 will be examined with the elected group.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3724
